

# GREEN TROUGH™

INNOVATIVE CABLE ROUTE MANAGEMENT

- Green Trough is a lightweight, environmentally friendly cable trough system made from recycled plastic
- Available in 6 sizes. Each size can be supplied as a straight, gradient, bend or T-Junction unit
- CE mark and 50 year life. Green Trough is a true replacement for traditional concrete
- Used worldwide on major infrastructure projects for over 15 years including Koge Nord, London Bridge, Japan Railways and many more
- Approved by Banedanmark, Japan Railways and Network Rail UK
- Secure interlocking units and lids. Flexible joints can navigate around obstacles without any need for further on site processing
- Self extinguishing and safe for use in temperatures from -30 to +80 degrees C
